- **USB Driver install – BLE dongle (BLED112)**

1. Connect the BLED112 USB dongle via USB to your PC
2. Windows will recognize the device and prompt for a driver software, use the driver located in the *windrv* folder
   - ✓ If Windows does not prompt for the driver, go to *Device manager,* select the unknown device and click *Update driver software*
3. If Windows security gives a waring about the driver installation, choose *Install this driver software anyway*
4. After driver installation a device called *Bluegiga Bluetooth Low Energy* *should be visible under* **Ports** *in Windows* **Device manager**
5. If you see this, the driver installation is complete
